GOVERNMENT NOTICE

DEPARTMENT OF MINERALS AND ENERGY

No. R. 989

5 October 2006

MINE HEALTH AND SAFETY ACT, 1996 (ACT No. 29 OF 1996)**AMENDMENT TO THE REGULATIONS IN RESPECT OF OCCUPATIONAL HYGIENE**

Under section 98 of the Mine Health and Safety Act, 1996 (Act No. 29 of 1996), I **BP Sonjica**, Minister of Minerals and Energy, after consultation with the Council, hereby amend the regulations published under Government Notice No. R 904 appearing in Government Gazette 23583 of 2 July 2002, as set out in the Schedule

BP SONJICA (MP)
MINISTER OF MINERALS AND ENERGY

SCHEDULE**Definitions**

1. In these regulations "the Regulations" means the regulations published under Government Notice No. R 904 in Government Gazette No 23583 of 2 July 2002.

Substitution of regulation 22.9(2) (a)

2. The table on "Occupational Exposure Limits for Airborne Pollutants" under regulation 22.9(2)(a) of the Regulations is hereby substituted by the following table-

2006 OCCUPATIONAL EXPOSURE LIMITS FOR AIRBORNE POLLUTANTS

Tabulation shows Inhalable particulates unless indicated to be respirable

NOTES

- [a] The concentration of "respirable particulate" shall be determined from the fraction passing a size selector with an efficiency that will allow:
- [i] 100% particles of 0 µm aerodynamic diameter;
 - [ii] 50% particles of 4 µm aerodynamic diameter;
 - [iii] 30% particles of 5 µm aerodynamic diameter;
 - [iv] 1% particles of 10 µm aerodynamic diameter.
- [b] Exposure to a substance with an OEL demarcated with an asterix must be kept as far below the OEL as is reasonably practicable.
- [c] The OEL for Aluminium does not include exposure to aluminium coated with mineral oil, or to fume arising from aluminium welding processes.
- [d] The 8 hour OEL for cotton dust is based on static air sampling rather than personal sampling.
- [e] Explosion hazard.
- [f] Simple asphyxiant. See also Note [e] for Flammable gas.
- [g] Ensure that due regard is given to crystalline silica content of the dust.
- [h] The OEL for welding fume is without prejudice to any occupational exposure limits for individual components in the fume. Some welding processes generate fume that contains components, which have specific OELs, these limits should be applied to control exposure if these substances are present in the fume.
- [i] For practical reasons in monitoring OEL-STEL may be used as OEL C for use underground.
- Sen Sensitiser.
- Sk Danger of cutaneous absorption.
- [06] Revised in 2006.
- [06*] New addition in 2006.
